Our Vision

To be a leading indigenous provider of integrated upstream energy and support services in Nigeria and the Gulf of Guinea, recognized for safety and technical excellence

Our Mission

To deliver safe, reliable and locally-driven services across the drilling, completion, production and facilities lifecycle, creating lasting value for our clients, our people and our communities.

Our Values

Safety first · Integrity · Technical excellence · Local content · Partnership. These principles guide every decision and every scope we deliver.

The background image on the left side of the slide is a photograph of an oil rig. It shows a complex structure of yellow and grey metal beams, with a large yellow crane arm visible. A thick black cable runs diagonally across the frame. The image is partially covered by a green rectangular overlay on the right side.

About Us

NEXA Energy and Support Services Limited is an indigenous oil & gas services company that brings project delivery, well services, production support, environmental engineering and specialist manpower together under one accountable partner.

Incorporated in Nigeria 2024, NEXA was established by partners who bring complementary expertise across drilling and well services, fluids engineering, facilities and project delivery, HSE and commercial management. The company is built to combine global technical standards with deep local capability and full Nigerian Content compliance.

Our model is deliberately integrated: rather than coordinate many separate vendors, clients can consolidate scopes with a single capable partner across the drilling, completion, production and facilities lifecycle, reducing interfaces and sharpening accountability.

We are technically led and HSE-first. Our work is underpinned by qualified personnel, recognized methodologies, and partnerships with established original-equipment manufacturers and technology providers, giving clients proven technology backed by responsive local service.

From land operations to swamp and offshore environments, NEXA is committed to safe, reliable delivery guided by our values of safety, integrity, technical excellence, local content and partnership

Our Objectives

NEXA is committed to creating sustainable value through a focused set of objectives:

1. **Service Excellence.** Consistently meet and exceed client expectations through disciplined, quality delivery.
2. **Health, Safety & Environment.** Pursuing zero harm to people and the environment in every operation.
3. **Nigerian Content.** Maximize local capacity, jobs and human-capital development in line with the NOGICD Act 2010.
4. **Client Partnership.** Build responsive, transparent, value-driven relationships with clients and stakeholders.
5. **Operational Efficiency.** Optimize cost and cycle time through strong project, resource and financial controls.
6. **Sustainable Growth.** Build a profitable, resilient indigenous business that endures and scales responsibly.

Our Approach

Integrated, single-source delivery

One partner across the well and facility lifecycle, fewer interfaces, clearer accountability, faster decisions.

Strategic technology partnerships

Alliances with established OEMs and technology providers deliver global technology with dependable local services.

Disciplined project & financial controls

Rigorous management of scope, schedule, cost and liquidity to protect delivery and resilience

Robust HSE & risk management

Safety, environmental care and proactive risk management are embedded in every scope from the outset.

HSE, Quality & Nigerian Content

NEXA Energy and Support Services Limited is committed to a goal of zero harm to people and the environment, to delivering quality that meets international standards, and to building Nigerian capacity. We operate to [ISO 9001 / 14001 / 45001], comply with NUPRC and NCDMB requirements, and embed Nigerian Content and human-capital development into every project, prioritizing local goods, services and personnel, and the training that builds lasting local competence

Our Services

Drilling & Well Engineering Services

Drilling Rig Provision

The right rig, crewed and drilling-ready, matched to your well, your terrain and your schedule.

- Land, swamp, barge, and offshore drilling rig solutions
- Custom rig packages for different well depths and drilling programs
- Bareboat hire and fully crewed drilling rig operations
- End-to-end rig mobilization, demobilization, setup, and logistics support

Our Services

Drilling & Well Engineering Services

Drilling and Completion Fluids Services

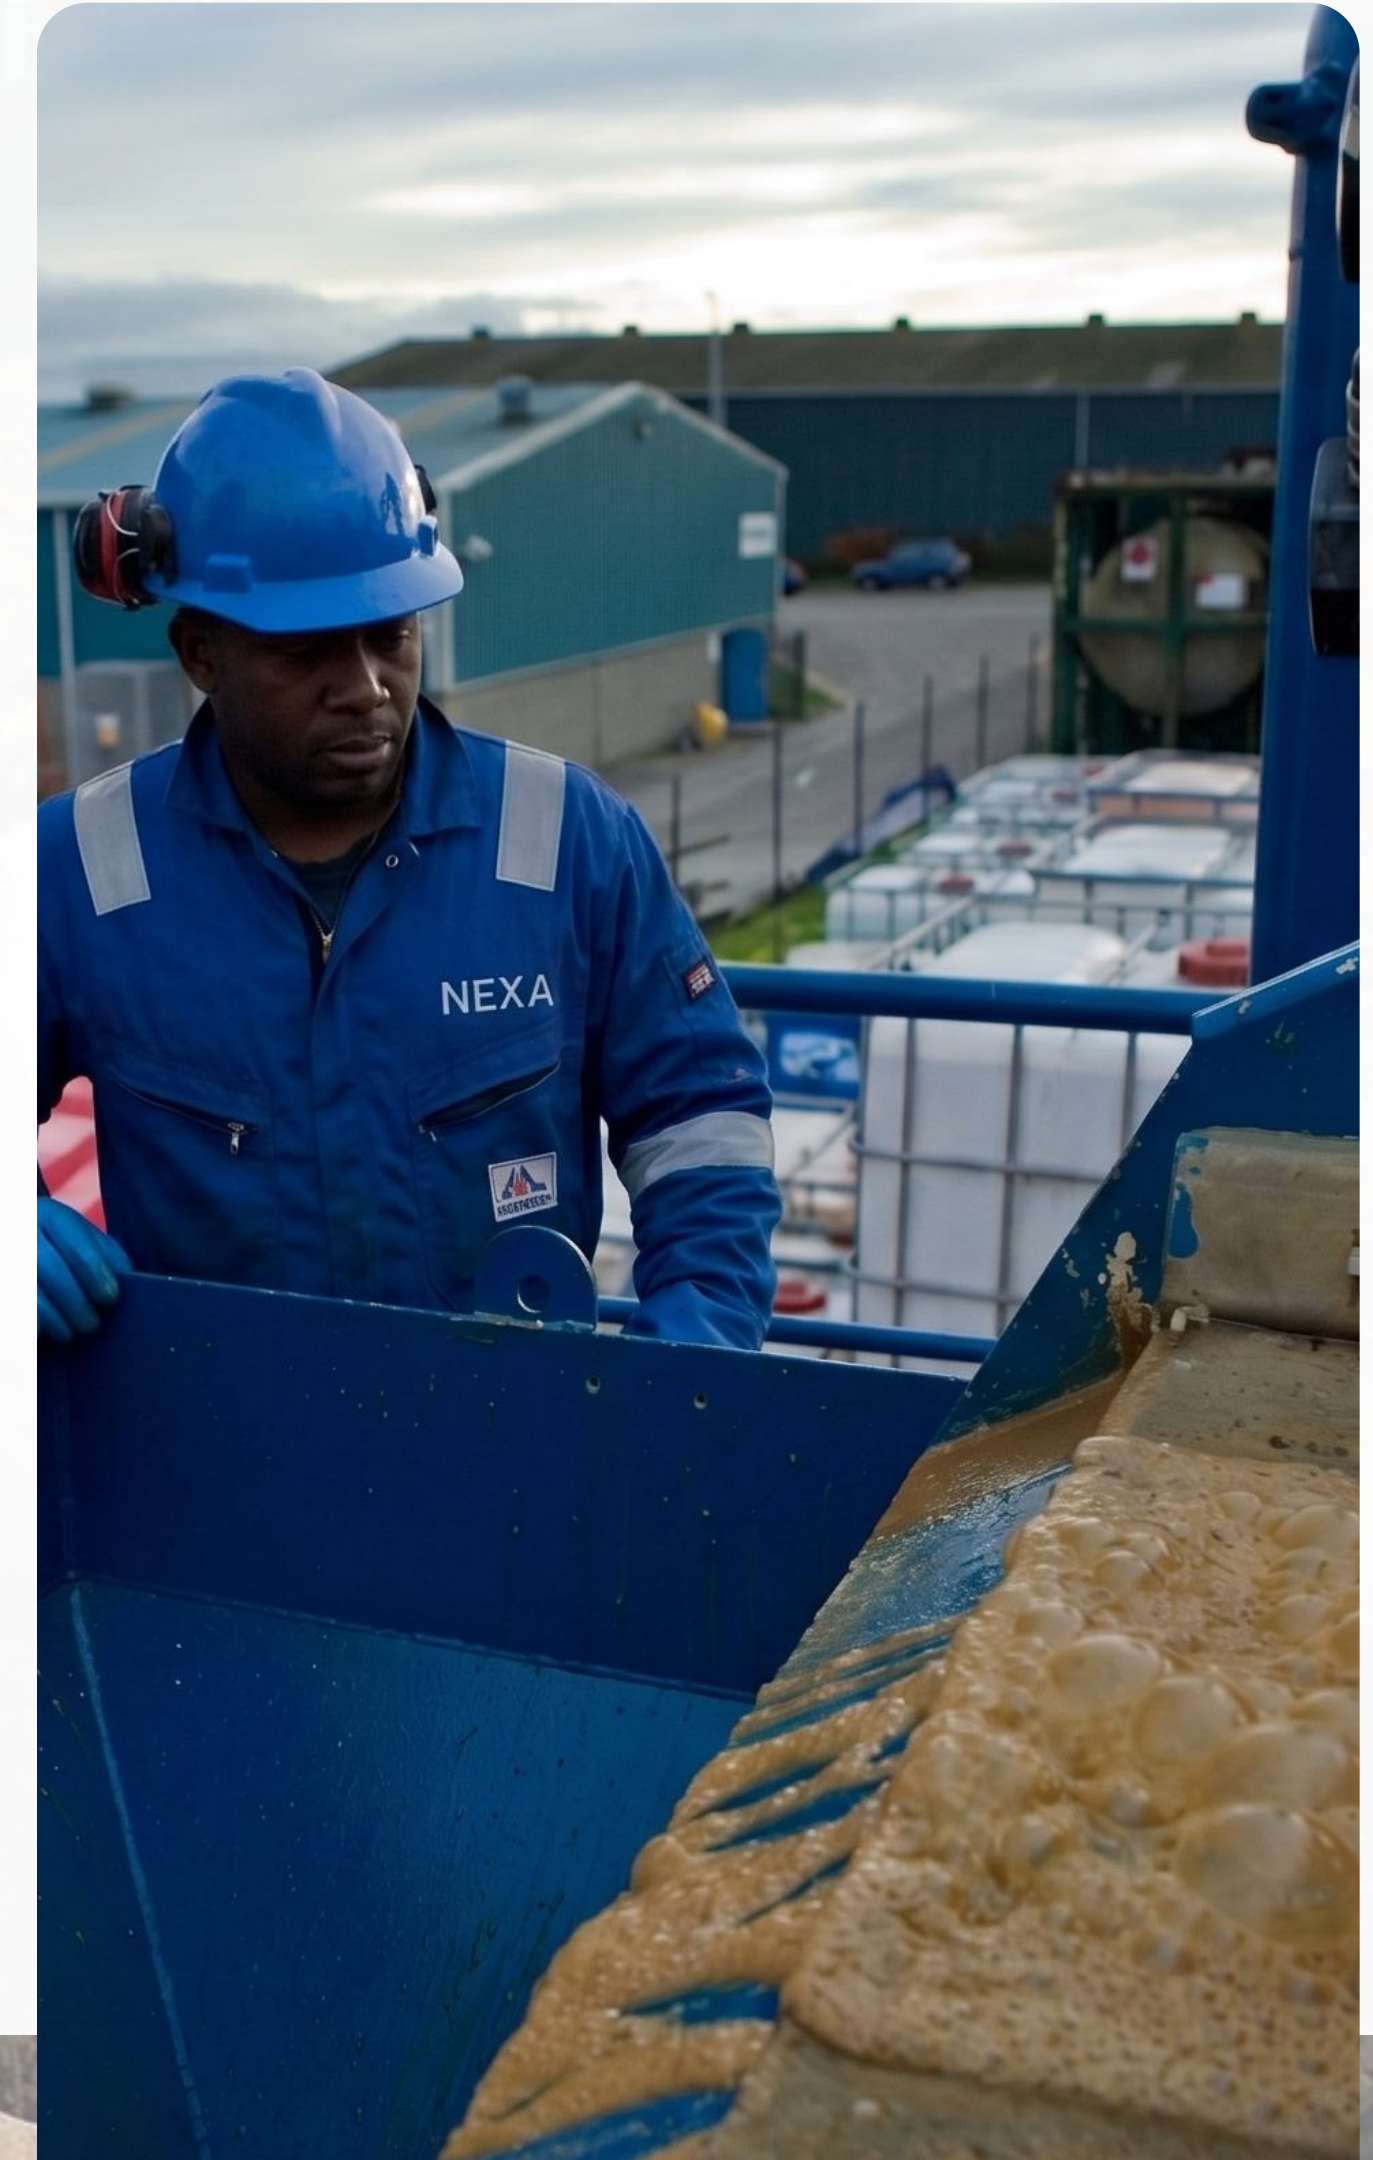

Engineered fluid systems that protect the wellbore and the reservoir.

- Ultra-inhibited water-based drilling fluids.
- Oil- and synthetic-based mud systems.
- HP/HT clean fluids up to 16 ppg and 390°F.
- Completion and workover brine systems.
- Fluid-conditioning solutions for all environments.
- Rapid fluid mixing and deployment capabilities.
- Ready-to-deploy, quality-assured chemical inventory.
- On-site mud engineering and operational support.

Solids Control Services

Cleaner fluids, less waste, faster drilling.

- Shale shakers, mud cleaners, desanders/desilters, centrifuges, dewatering units
- Trained operators and field service; equipment-package rental
- System optimisation to cut dilution and disposal volumes and improve ROP

Our Services

Drilling & Well Engineering Services

Drilling Waste Management

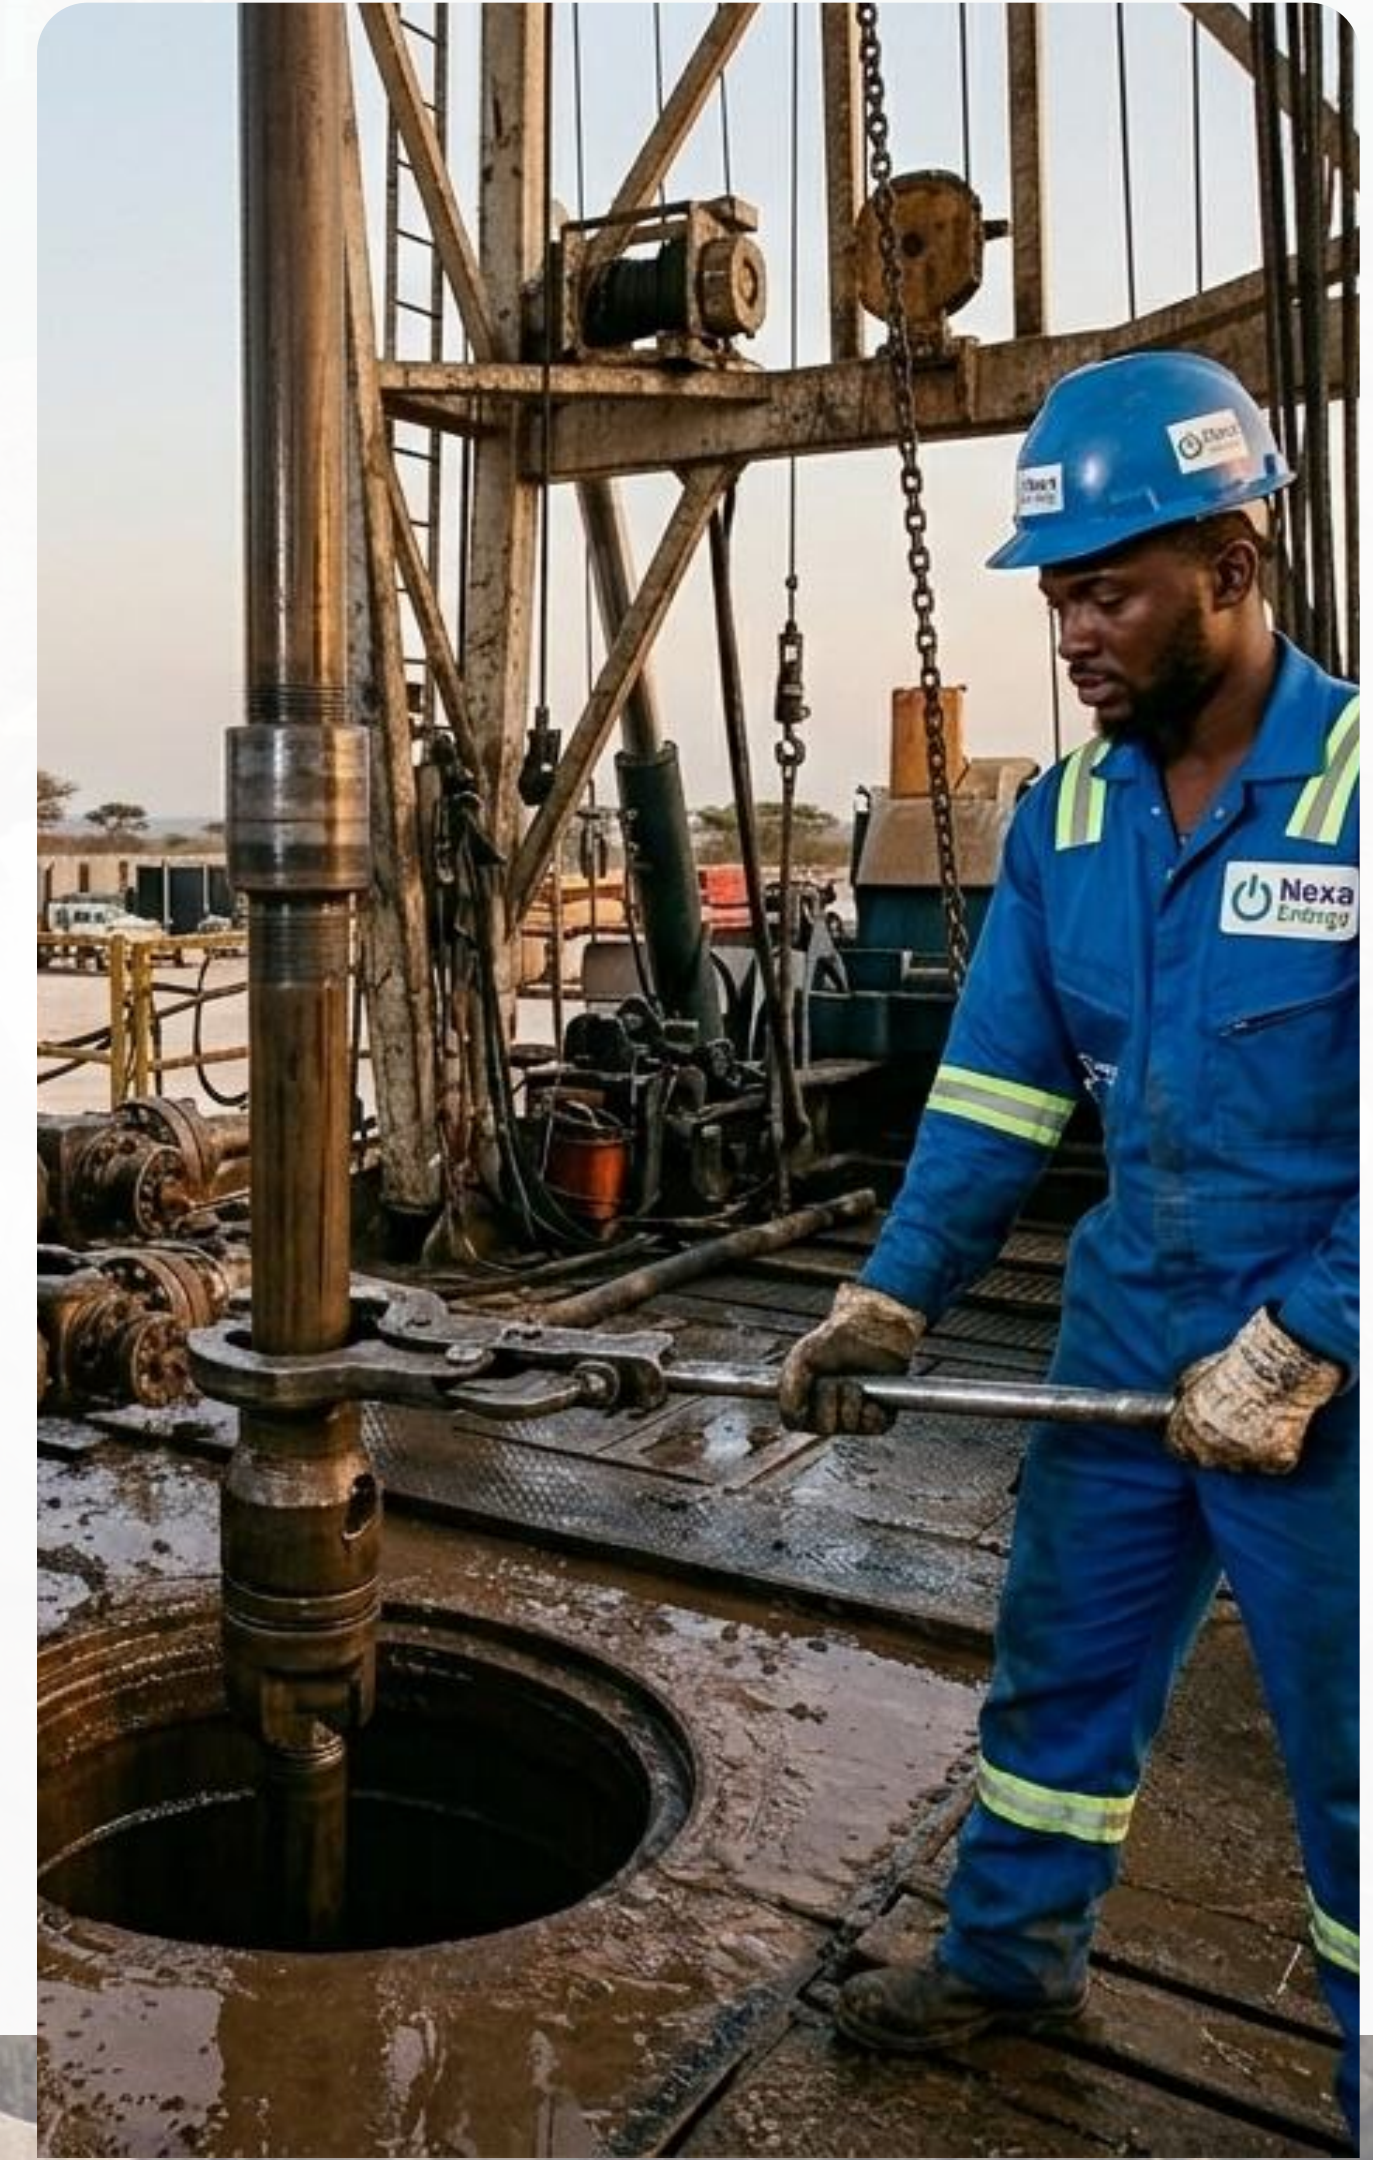

Zero-harm, fully compliant management of drilling waste.

- Cuttings collection, transfer and treatment
- Cuttings dryers, thermal desorption, stabilisation and bioremediation
- Skip-and-ship logistics; cuttings re-injection (CRI) support
- Compliance with NUPRC, NESREA and EGASPIN requirements

Wellbore Clean-Up Services

Clean casing, clear brine, protected completions

- End-to-end wellbore clean-up combining mechanical and chemical displacement in one engineered program.
- Mechanical clean-out using scrapers, brushes, magnets, and junk baskets to remove debris and solids.
- Chemical displacement with engineered spacers and pills to remove fluids and water-wet casing.
- On-site program design and supervision for onshore, offshore, and deep-water wells.

Our Services

Drilling & Well Engineering Services

Filtration Services

Solids-free fluids, on spec, every time

- High-efficiency filtration of drilling and completion fluids to required clarity (NTU spec).
- Multi-stage filtration using DE units, filter presses, and cartridge/bag systems.
- Brine clarification and reconditioning for reuse at gauge quality.
- Integrated filtration support across clean-up, completion, and stimulation work.
- On-site systems with real-time turbidity monitoring for all well environments.

OCTG Supply & Procurement Services

The right tubulars, to spec, on schedule

- Supply of OCTG (casing, tubing, drill pipe, line pipe, and accessories).
- Sourcing API and premium grades, including corrosion-resistant options.
- Certified mill supply with full traceability.
- Third-party inspection and thread verification.
- Threading, repair, and refurbishment services.
- Inventory management (call-off and buffer stock).
- Logistics, customs clearance, and site delivery.

Fishing & Rental Tool Services

Recover the well, protect the asset, minimise downtime and expertise on demand.

- Downhole fishing to recover stuck or lost equipment (pipe, BHA, tubing, packers, junk).
- Custom fishing strings using overshots, spears, jars, and related tools.
- Milling and washover services to remove downhole obstructions.
- Junk recovery tools including baskets, magnets, and circulation tools.
- Rental fleet of fishing, drilling, and pressure-control equipment.
- On-site supervision and tool-string engineering for all well environments.

Our Services

Project & Facilities

Project Management & Turnkey Projects

Single-point accountability from concept to commissioning.

- Integrated cost, schedule and scope controls; stage-gate governance
- Engineering, procurement and subcontract coordination
- QA/QC and HSE assurance; risk and change control
- Structured close-out and handover (PMI/PRINCE2 methodologies)

Facility Upgrades

Extending asset life and lifting production through safe brownfield modification.

- Facility debottlenecking, upgrades, and refurbishment
- Structural steel and piping fabrication
- Asset integrity, corrosion management, and protective coatings
- Fire & Gas (F&G) system upgrades and modernization
- Shutdown, turnaround (TAR), and maintenance support

Facility Maintenance & Reliability

Maximizing uptime, safety and asset life - onshore, offshore and afloat.

- Preventive, corrective, and predictive maintenance
- Onshore and offshore facility maintenance
- Floating production asset maintenance
- Mechanical equipment maintenance
- Shutdown and turnaround (TAR) management

Our Services

Production & Laboratory

Production Chemicals

Protecting production and assuring flow with the right chemistry.

- Corrosion and scale inhibitors, demulsifiers, biocides and H₂S scavengers
- Paraffin/asphaltene and flow-assurance chemicals
- Chemical management programmes, dosing optimisation and residual monitoring
- Laboratory selection and compatibility testing

Laboratory Services

Accurate data for better decisions.

- Drilling-fluid and completion-brine testing
- Production-chemical selection and compatibility studies
- Water, corrosion and scale analysis; environmental sampling and analysis
- QA/QC and method documentation (ISO/IEC 17025 as a stated target)

Our Services

Environment & People

Environmental Engineering, Methane LDAR & MRV

Helping operators cut emissions and meet Nigeria's methane and decarbonisation targets.

- Leak Detection and Repair (LDAR) using optical gas imaging and sensors
- Methane quantification and Measurement, Reporting & Verification (MRV)
- Flare and vent assessment; emissions inventories aligned to OGMP 2.0
- Support for compliance with NUPRC methane regulations

Manpower Supply

Competent, HSE-assured personnel, locally developed.

- Technical and non-technical personnel across drilling, engineering, HSE and operations
- Competency assessment and HSE/offshore training (BOSIET/FOET/HUET)
- Payroll, HR and statutory compliance; secondment and managed-service models
- Nigerian Content human-capital development plan

Capability & Delivery Model

Integrated Scope

One partner across the well and facility lifecycle, reducing interfaces and risk.

Technical Leadership

Qualified engineers and field specialists applying recognized standards and methods.

HSE Assurance

Safety and environmental performance embedded in planning and execution.

Local Capacity

Nigerian Content and human-capital development on every engagement.

TRACK RECORD

NEXA Energy and Support Services Limited presents the verified project experience of its founders and key personnel.

Our People

NEXA is led by a team of professionals with complementary, verifiable experience across the upstream value chain. Our structure is organized into clear functions, operations and technical, business development, finance and commercial, and HSE and compliance, managed to ensure safe, accountable delivery.

Registrations & Certifications

NEXA maintains the statutory registrations and industry certifications required to operate and bid in the Nigerian upstream sector.

Registration / Certification

- CAC Incorporation
- NUPRC OGISP
- NCDMB NOGIC-JQS
- NIPEX / NJQS
- ISO 9001 / 14001 / 45001
- Tax (TIN / VAT / TCC)
- PENCOM / ITF / NSITF
- DUNS Number
- OEM Authorizations
